Job Description: Project Manager

Company Overview

- We are a software start-up based in Auckland and Christchurch, NZ
- Spritely is the number 1 supplier of age-friendly technology to the retirement village industry
- Our fully managed system is also used by medical alarm companies, pharmacies, social housing NGOs and homecare providers around the country
- We are a close-knit team of engineers and product specialists working to help New Zealand seniors stay independent for longer

Why We're Hiring

- We are growing and we need your skills to transform the way we deliver healthcare for New Zealand's senior population at a critical juncture in the history of our country's healthcare system.
- You'll be joining a team of talented engineers, working right alongside the people who built the platform from the ground up. You'll also be liaising with senior leaders across the aged care sector as the industry moves quickly to adopt a range of remote medical monitoring technologies and communication technologies.

The Role

You will be asked to:

- Analyse business software requirements
- Plan software projects from start to finish
- Define the scope of projects
- Manage project delivery
- Participate in sprint planning
- Manage budgets and deadlines
- Oversee testing, evaluation and troubleshooting

Aged care technology making our seniors healthier, safer and more connected.

- Track and manage change requests
- Manage delivery and implementation of software to customers
- Collaborate with internal and external team members to design and launch new features
- Participate in and evolve an agile software development process
- Perform user acceptance testing on new features
- Keep internal documentation up to date and relevant

Skills and Experience

- You must be an enthusiastic and motivated team player
- You should have knowledge in all stages of software development life cycle
- Proven experience managing software projects
- Good leadership and communication skills
- Excellent stakeholder management
- Experience managing relationships with large enterprise clients
- Strong attention to detail

If you have any of the skills and experiences listed above, reach out and get in touch with our team. We are looking for motivated engineers who aren't afraid to learn new technologies, and want to develop new skills and push themselves to deliver high quality code in a fast paced agile environment. All this while improving the accessibility of healthcare services throughout New Zealand and overseas.

Aged care technology making our seniors healthier, safer and more connected.
